DETAILED ACTION

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, ***"The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.***

The abstract of the disclosure is objected to because of the use of the phrase "is disclosed" on line 2. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 appears to contain a plurality of sentences (i.e., lines 15-17) which is improper form and inherently unclear.

Allowable Subject Matter

Claims 7-20 are allowed.
